WORK EXPERIENCE

pseudocode.agency | tripadvisor.com

Aug. 2021– Mar. 2025

Software Engineer

Split, Remote

- **Tech Stack:** TypeScript, CSS, React, Cypress, AWS, Java
- Part of the team that built an AI Trip Builder with multi-step form that increased platform users by 40%
- Refactored and implemented redesign as A/B test for save button that is used across applications. Led communication between teams and coordinated the release process and stakeholder requirements.
- Setting up automated testing for our team flows on AWS using codebuild, cypress, lambda and event schedulers
- Migrated internal tool for fraud detection from Velocity to React.js
- Day to day communication with PM-s, Stakeholders, contributing to team members by doing code reviews and various meetings and documenting processes

devot.com

Dec. 2020 - Aug. 2021

Software Engineer

Remote, Zagreb, Split

- **Tech stack:** React.js, Ruby on Rails, Selenium,
- Developed a global date-time system and timesheet calendar for Teladoc, ensuring seamless timezone support. Delivered a complete feature within 15-20 days despite no onboarding, due to EOY time constraints.
- Delivering rich features like datepickers, complex selections and form covering with unit and integration tests (enzyme and selenium based)

Buchhaltungsbutler.de

Feb. 2020 - Dec. 2020

Software Engineer

Remote, Split

- Fully responsible for the entire Wordpress for marketing and knowledgebase. Theming, daily support, handling server maintenance, bug solving, feature development
- Delivered a complex redesign with intricate elements and shapes within a less than one-month deadline, seamlessly integrating it into the existing Wordpress site.

Elevencode

Sep. 2017 - Feb. 2020

Web developer | Freelance

Remote, Split

- Tamigo.com - I have been contracted to implement redesign to existing site, saving company more than 10.000€ (price of the licensed one they aimed to buy) making a small utility framework for bootstrapping all the design components into reusable elements and classes
- Feg.eu (formerly hattrick) - implemented designs for dog racing using vue.js with various unconventional screens and iframes with pixel perfect designs
